

Appendix D - 17 Detailed Introduction to the Library

Detailed introduction to the library

The school library consists of the Run Shaw Library (main library), the Planning and Architecture Branch Library, and 11 departmental reference rooms, forming a “1+1+11” main - branch library and reference room system. The total area is 21,050.0 m², with 2,746 reading room seats and 60 e - reading seats. The library has 2,845,084 printed books. In 2023, 24,122 new printed books, 4,846 printed periodicals (including 156 foreign - language periodicals), and 49 newspapers were added. There are nearly 2.28 million e - periodicals available, over 9.74 million master's and doctoral theses, and nearly 4.21 million e - books. Two compact stacks have been built, where nearly 430,000 books previously stored in stock are re - classified and shelved in a compact form for readers to borrow. The construction of literature resources meets the needs of teaching, scientific research, and the reading requirements of teachers and students. For statistics of book resources, please refer to Tables D - 12 - 1, D - 12 - 2, and D - 12 - 3.

The library adopts an integrated collection, lending, and reading service model with fully open - shelf borrowing. It provides readers with various types and levels of services such as borrowing, reading, consultation, literature retrieval and delivery, reader education, and training. In particular, a special area for postgraduate entrance examination preparation has been set up, with 900 seats to support students' postgraduate entrance examination efforts. The library is open 7 days a week (except during the winter vacation), with an opening time of 105 hours per week. Digital resources are available 24/7. During the epidemic - related closure, online services were mainly provided, including entrusted borrowing services and point - to - point services, to serve teachers and students with high - quality services. The annual number of readers received is 1.68 million, with an occupancy rate of over 90%. The number of books borrowed is 98,657 copies, the number of visits to digital resources is 30.721 million times, and the number of downloads is 1.2869 million times. Also, a “Chinese and Foreign Literature Service Group for Teachers” has been established, and 56,360 pieces of literature are transmitted in real - time. The Golden Disk NET Library Integrated Management System is adopted. Through the multi - library and

Appendix D - 17 Detailed Introduction to the Library

reference room model, services are provided to all readers in the school on a unified platform to achieve the co - construction and sharing of literature and information resources across the school.
